EDUCATION

Electrical and Electronics Engineering

Kathmandu University / Dhulikhel
/ February, 2020 - Present

+2 Science stream Gems
Collage / Patan / June, 2018 -
March, 2020

SLC /Subhadhara Secondary
School / Banepa / April, February,
2018

SKILLS

- ◆ KiCad/ Proteus/Altium (PCB Design and Circuit Simulation)
- ◆ Embedded Systems:
- ◆ Microcontrollers
- ◆ Matlab and Simulink
- ◆ Control System Design -
- ◆ Simulink
- ◆ FPGA Programming- VHDL
- ◆ OOP , Python for Data Science,
- ◆ AWS, Data
- ◆ Optisystem
- ◆ Deeplearning tools
- ◆
- ◆

Simran Pokharel

Student

Motivated and aspiring Electrical Engineering undergraduate with expertise in, C, C++, Python & Deep learning skills. Experienced in circuit simulation using Proteus and KiCad. Dedicated to innovation and adept at problem-solving.

TRAINING/ CERTIFICATIONS

Intermediate and Advanced HTML and CSS

The odin project / 2023

C, C++

The development project / 2022

Python and Machine learning

Kaggle / 2023

PROJECTS

Robotic Crawler

Anuj Shrestha

Electrical Engineer & Data Enthusiast

Designed, tested and fabricated a control system for robotic arm, ensuring precise operation and robust performance.

8- Bit Computer

Designed, tested a functional system for an 8-bit computer.

Smart Meter and prepaid electricity meter

Designed and tested a smart meter with a prepaid billing system.

Audio Recognition using Deep Learning

Developed and tested an audio recognition using deep learning for precise sound classification.

Performance Analysis of multimode fiber

Conducted performance Analysis of single- mode and multimode fibers using Optisystem software for evaluating transmission efficiency.
